CAMPGT

ADVANTAGES

- Lightweight construction for easy mounting
- Static air filter with long life and low initial pressure drop

• Fully incinerable

Application	Suitable for demanding operating conditions like heavy polluted rural or industrial areas Pre- or final filter for gas turbines, large industrial air compressors, diesel & gas engines, generators & enclosures, wind turbines					
Frame	Plastic molded;ABS					
Gasket	Polyurethane, endless foamed					
Media	Glass fiber					
Separator	Hot-melt Separator Technology					
Sealant	Polyurethane					
Grille, Downstream	Support grid for filtermedia					
Rec. final pressure drop	450 Pa					
Max Temperature (°C)	70°C					
Relative Humidity max	100%					
Installation Options	In a separate bank, from the upstream or downstream sides.					
Comment	Addtional product features: Lightweight construction for easy mounting Downstream synthetic scrim support Fully incinerable XL version available on request.					

The CamPGT is an energy efficient solution functioning as a high efficiency filter in Camfil medium velocity multistage inlet houses. It is intended for inland industrial and rural areas. Its unique geometry provides a large inlet area and optimized air flow, thus offering a lower pressure drop than industry standard for V-shaped barrier filters.
